

Caro(a) sócio(a),

Esta é a 'newsletter' de 11 de Dezembro de 2009 da Sociedade Portuguesa de Química, que dá a conhecer algumas actividades da Sociedade.

Caso pretenda partilhar alguma informação pertinente com os sócios, envie um email para sede@spq.pt.

Muito obrigado.

1 - Homepage of Paris Symposium

The website for the 10-year celebratory symposium for ChemBioChem and ChemPhysChem has been live for a week. Registration is also open and costs less than €100 for the whole day.

Numbers are limited, so the even more reasonable Earlybird registration saving a further €14 is advisable for more than financial reasons. In your e-mailings, please inform your members of this high-powered one-day meeting with 10 speakers, 40% of whom are Nobel Prizewinners! It would be a pity if one of your members would like to attend but missed this once in a life-time opportunity, because they heard about it too late.

The link is: <http://www.chembiophyschem.org>

2 - Grants for young chemists to attend the EuCheMS Chemistry Congress, Nürnberg 2010

The participation of younger chemists in scientific conferences is of great value to their future professional career. In addition to the scientific knowledge acquired by participating in high level conferences, there is a unique opportunity to develop contacts with senior scientists, to exchange experiences and to promote networking.

On behalf of EuCheMS and our European Young Chemists Network (EYCN) we would like to strongly encourage all EuCheMS member societies to encourage the attendance of young chemists at the 3rd EuCheMS Chemistry Congress, in Nürnberg on 29 August - 2 September 2010 where, in addition to the attractive scientific programme, there will be a number of valuable career-oriented events and a job fair. These activities are being organised specifically for the benefit of young researchers and PhD students attending the Congress. Further information is available on the 3rd EuCheMS Chemistry Congress website <http://www.euchems-congress2010.org>

We should be pleased if your Society would consider providing grants to cover some or all of the costs of registration, travel and accommodation in order to help some of your Society's students and younger members to participate in the Nürnberg Congress. A special reduced fee and low cost accommodation will be available for student members of your Society.

3 - Inquérito SPQ 2009 - ONLINE

A SPQ interessada em melhorar cada vez mais os seus serviços, vem por este meio, mais uma vez, recolher a sua opinião.

São dez questões simples, demora menos de um minuto a responder.

Obrigado pelo seu contributo.
